

Anti Tax Avoidance Package: EU to implement new measures against corporate tax avoidance

The European Commission has recently opened up a new chapter in its campaign for fair, efficient and growth-friendly taxation in the EU with new proposals to tackle corporate tax avoidance.

The Anti Tax Avoidance Package contains concrete measures to **prevent aggressive tax planning**, **boost tax transparency** and **create a level playing field** for all businesses in the EU.

Many of the new measures follow on from the recent OECD/G20 Base Erosion and Profit Shifting project and will allow coordinated EU action against BEPS.

All RoyaltyRange intellectual property royalty rates data fully complies with the latest OECD and upcoming EU standards.

RoyaltyRange is your trustworthy tool even in the most complex European tax analysis.
